SUMMARY

I am a Sr. Java Backend Developer with nearly 5 years of experience in the Payment and Telecom domains. I have strong technical skills, particularly in core Java and SQL, as well as a good knowledge of the Spring Boot framework. I'm eager to explore new opportunities that will challenge me further and enhance my problem-solving abilities.

EXPERIENCE

Senior Software Engineer

Girmiti Softwares

08/2024 - 01/1970 Bengaluru, India

Software development company specializing in fintech solutions.

- Developed and maintained Spring Boot microservices for routing banking transactions into the TSS system across POS, web, and other channels.
- Integrated Change Financial Issuer into the TSS system, enhancing issuer/acquirer capabilities for multiple banks in Australia and New Zealand.
- Designed and implemented ICF extract files to support multi-acquirer functionality.
- Ensured seamless deployment using Jenkins CI/CD pipelines and Docker containers.
- Collaborated with cross-functional teams to optimize system performance and reliability.

Senior Software Engineer - Lead

Payment Middleware-NamiPay

04/2023 - 07/2024 N/A

A company providing innovative payment processing solutions.

- Designed, developed, and maintained payment processing systems using Java, Spring Boot, and microservices architecture, resulting in increase in transaction throughput.
- Implemented secure authentication and authorization mechanisms to protect sensitive payment data, ensuring compliance with industry standards and regulations.
- Collaborated with cross-functional teams to gather requirements and design RESTful APIs for seamless integration with external partners.
- Integrated third-party applications into existing software, enhancing features and performance.

Associate Software Developer

Raysteeds Infotech Pvt Ltd

03/2020 - 04/2023 Dehradun, India

A technology company focusing on data processing and telecom solutions.

- Parsed the raw data files (ASCII, ASN and Binary data files) coming from the telecom operators into the readable format using the parsers (java coded classes) and loading the data into the raw tables using the raw telecom adapters.
- Developed business rules on the data based on the raw data using core Java coding.
- Processed the developed Telecom Adapter in the ETL (Extract Transform Load) Server to process the raw data files and loaded them into target tables.
- Generated KPIs for the clients based on the transformed data.

EDUCATION

Bachelor of Engineering

Graphic Era University

08/2012 - 05/2016 Dehradun, UT

Higher Secondary Education

B.D public school

04/2010 - 04/2012 Patna, BR

KEY ACHIEVEMENTS

Awards

Recognized for my contribution as Most Innovative Employer of the Year in both 2021 and 2024 and also awarded Overall Best Employee.

Onboarding Project Lead

Led the onboarding project successfully in 2023.
